

Special Purpose Limiter

Sweeping operations which are carried out at too high a speed leave the dirt uncollected and the sweeping gear damaged, particularly by speed bumps. This often results in expensive repairs and vehicle downtime.

Autokontrol were recently asked by a large Scottish Council experiencing regular problems if we could fit a limiter to restrict the vehicle speed to 8mph when sweeping.

Our Romatic DbW limiting device was successfully fitted to the vehicle achieving the required speed.

Autokontrol believe that by fitting our limiter at a cost of £300.00 + VAT per vehicle speed induced Sweep Gear damage should be a thing of the past.
